ABOUT ME

I am a motivated and adaptable student with a passion for data analysis and programming. Currently pursuing a certificate in Web & Computer Programming at Brigham Young University – Idaho, I have developed skills in Python, HTML/CSS, Java, and JavaScript. Through my experience as a Data Analyst at Springboard, I have honed my ability to partition and organize datasets, ensuring accuracy and optimizing workflows.

During my mission work with The Church of Jesus Christ of Latter-day Saints, I led the development of a reporting system that increased missionary effectiveness by 20%. I also trained over 100 missionaries, helping them achieve high performance. In previous roles, such as a Customer Attendant at Valuemart Supermarket, I gained valuable customer service and inventory management experience, improving efficiency and sales.

I am eager to leverage my skills in data analysis, problem-solving, and communication in a professional setting, and continue learning and growing in the tech industry.

WORK EXPERIENCE

Springboard

Entry level | Data Entry Specialist
Abuja , United States
2024-07-01 | 2025-07-01

Implemented data partitioning and organizational frameworks to improve the structural integrity and retrieval performance of datasets. Achieved 100% accuracy in data validation, cleansing, and analytical processes, ensuring adherence to stringent quality standards. Utilized advanced workflow management methodologies to streamline data processing and enhance project delivery timelines. Partnered with cross-functional teams to uphold consistency and precision in all aspects of data management.

The Church of Jesus Christ of Latter-day Saints

Mid level | Missionary
Abuja , Nigeria
2023-06-01 | 2024-07-01

Assisted in developing and implementing a comprehensive reporting system for apartment maintenance issues and supply requests, improving efficiency and enhancing overall missionary effectiveness by 20%. Conducted multiple training sessions and orientations for more than 109 missionaries, ensuring they understood procedures and expectations, which contributed to consistently outstanding performance. Managed complex daily and weekly schedules, coordinated activities, and successfully completed 98% of planned tasks. Maintained records, monitored progress, and provided feedback to optimize workflow and support team success. Collaborated with colleagues to troubleshoot issues and improve operational processes

EDUCATION

Brigham Young University - Idaho

Degree | Degree
At Brigham Young University, I pursued my studies in Software Development, focusing on building technical skills such as coding, debugging, and problem-solving. I participated in hands-on projects and collaborated with peers to develop real-world solutions. The experience allowed me to enhance my programming abilities and gain practical knowledge in the field of software engineering

JOB SKILLS

- Document Review
- Attention to Detail
- High Level Of Accuracy
- Auditing
- Communication
- Front-End Development

LANGUAGE SKILLS

- English

CERTIFICATES & AWARDS

S.S.C.E: Certificate | 2020
